Instruments

- Trauma shears
- forceps
- Sterile needle
- irrigation syringe
- CPR barrier
- Venom extractor

Misc

- L.E.D. light
- magnifying lens
- 6 - H<sub>2</sub>O purification tabs
- 2 - sterile bags
- 1 - red biohazard bag
- 4 - safety pins
  
- First Aid Manual
- 2 - SOAP Notes

Special Instructions:

- 1 - Quik-Clot** - For severe bleeding. Wipe away as much blood as possible, then quickly pour Quik-clot into wound. Resume direct pressure. It is normal for some heat to be released (due to reaction w/ H<sub>2</sub>O).
- 2 - Temparin** - To replace a lost filling or secure loose crowns, etc. 1.Clean and dry tooth. 2. Scoop a small amount of Temparin, roll into a ball, and pack into cavity area. 3. Bite and grind your teeth several times. Hardens in a few minutes, sets in 2-3 hours.
- 3 - Benzoin tincture** - Helps adhesive (Steri-strips, moleskin, band-aids, etc) stick to skin.
